DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 19 rejected under 35 U.S.C. 102(e) as being anticipated by Kobayashi et al.
3. As to claims 1 and 19, Kobayashi et al. teach a hydrogen storage container comprising: an enclosed canister 30 having a wall and an outlet 38 for charging and discharging hydrogen gas; a metal hydride material (hydrogen occluding alloy) 32 contained within the canister 30 the material being capable of absorbing and desorbing hydrogen gas, and including a porous matrix disposed within the metal hydride material for providing efficient distribution of hydrogen gas to the metal hydride material (Col. 2, lines 57-62); and a gauge 20 for directly measuring the capacity of hydrogen that remains absorbed with the metal hydride material 32 and is available for discharge through the outlet opening 38.

Allowable Subject Matter

4. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
